# SECTION A: INTRODUCTION, DEFINITIONS AND PRINCIPLES

## 1. INTRODUCTION

The municipality need a reliable source of revenue to provide basic services and perform its functions. Property rates are the most important source of general revenue for the municipality. Revenue from property rates is used to fund services that benefit the community as a whole as opposed to individual households. These include installing and maintaining streets, roads, sidewalks, lighting and storm drainage facilities; and building and operating clinics, parks, recreational facilities and cemeteries. Property rates revenue is also used to fund municipal administration such as computer equipment and stationery, and costs of governance, such as council and community meetings, which facilitate community participation on issues of Integrated Development Plans (IDPs) and municipal budgets.

Municipal property rates are set, collected, and used locally. Revenue from property rates is spent within a municipality, where the citizens and voters have a voice in decisions on how the revenue is spent as part of the Integrated Development Plans (IDPs) and budget processes, which a municipality invites communities to input prior municipal council adoption of the budget.

Only if the property owned by the National and Gauteng Provincial Government is used for the provision of community-type services, will it be categorised as "State Owned" in which case the rate for State Owned property will be applicable.
- 7.10 Any property earmarked for development and complying with the definition of development land will be categorised in accordance to the above categories in terms of its current use.
