The Energy Regulator further directs as follows:

- NERSA has duly considered and noted the application submitted for approval the Small Scale Embedded Generators (SSEG) tariff. The application could not be approved because NERSA lacks both statutory and regulatory jurisdiction over the proposed activity between yourself and the Small Scale Embedded Generators.

Please note that in terms of the National Energy Regulator Act, 2004 (Act No. 40 of 2004), National Energy Regulator is entrusted to perform all the functions that the National Electricity Regulator used to perform, and amongst others, to review and approve tariff increase proposals by all licensed distributors of electricity in South Africa. Implementation of tariffs without approval of the Energy Regulator is a contravention of the license conditions issued to you.

It is therefore important that provision is made in your planning / budgeting cycle to allow time for the submission of applications for future changes or increases to NERSA for consideration.
